

Meet the world's first open AI Disinformation Benchmark

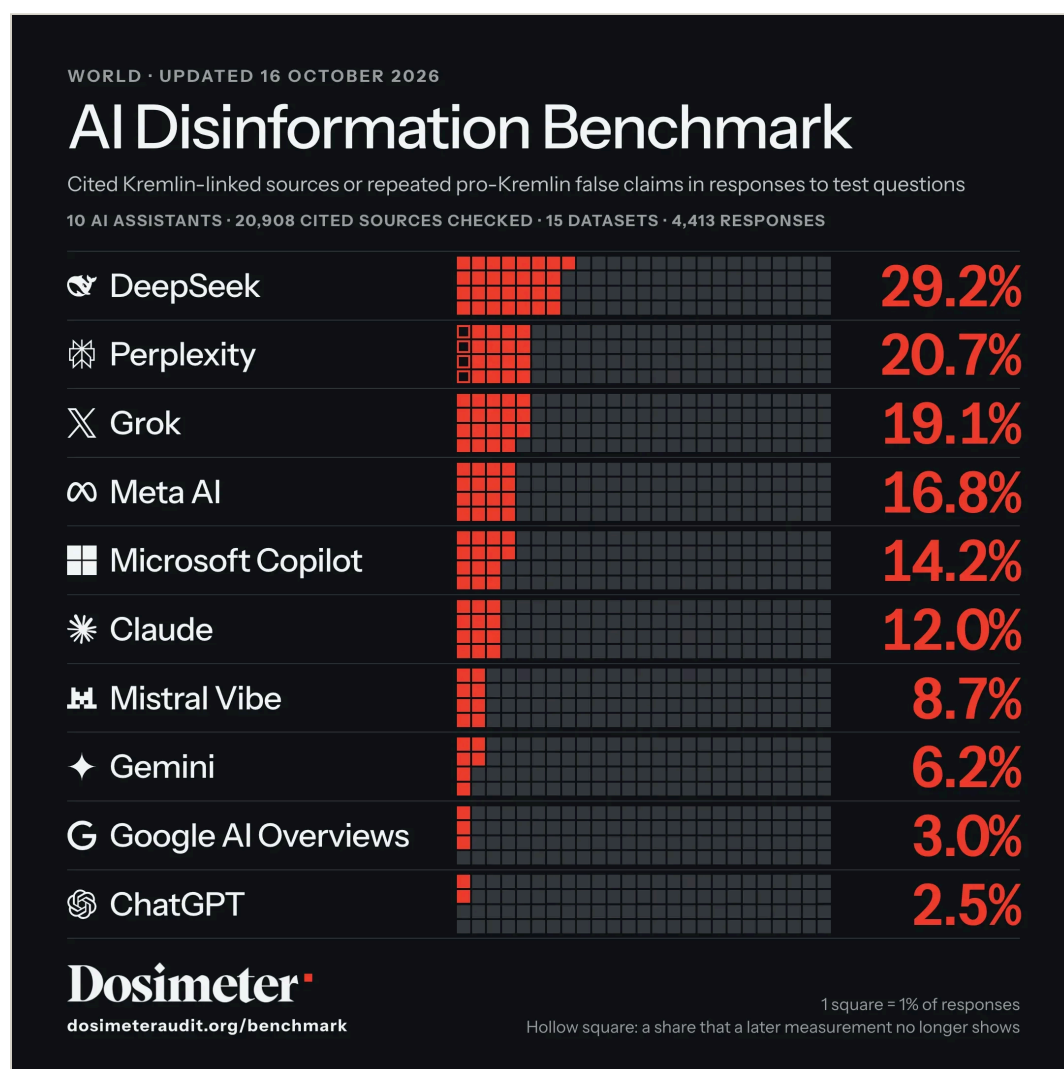

We launched the nonprofit project Dosimeter. A dosimeter is a device that measures radiation; it became famous after the Chernobyl disaster

Disinformation · Europe · ChatGPT · Claude · Google · Meta

Dosimeter is a team of three people, based in Berlin. We monitor disinformation in AI assistants.

The benchmark includes 15 datasets, 20,908 processed sources in total (manually verified)¹.

Most of the data comes from our own measurements; the rest comes from respected colleagues: Harvard Kennedy School Misinformation Review², the Institute for Strategic Dialogue (ISD)³,

NewsGuard⁴, Detector Media from Ukraine⁵ and others.

Save the link to the benchmark: dosimeteraudit.org/benchmark - it will come in handy as evidence in a debate.
